Login Page

User Login

URL: `http://127.0.0.1:8888/api/login`

Method: POST

Request body:

```
{
  "username": "string",
  "password": "string"
}
```

Response body:

```
{
  "code": "string",
  "message": "string",
  "data": {
    "permissions": [],
    "roles": [],
    "user": json
  }
}
```

User Register

URL: `http://127.0.0.1:8888/api/register`

Method: POST

Request body:

```
{
  "username": "string",
  "password": "string"
}
```

Response body:

```
{
  "code": "string",
  "message": "string"
}
```

Working Page

Upload Dataset

URL: <http://127.0.0.1:8888/api/model/upload>

Method: POST

Request body:

```
{
  "username": "string",
  "file": binary
}
```

Response body:

```
{
  "code": "string",
  "message": "string",
  "data": {
    "url": "string"
  }
}
```

Dataset List

URL: <http://127.0.0.1:8888/api/model/list>

Method: POST

Request body:

```
{
  "username": "string"
}
```

Response body:

```
{
  "code": "string",
  "message": "string",
  "data": {
    [
      {
        "filename": "string",
        "hasResult": int
      },
      {
        "filename": "string",
        "hasResult": int
      },
      ...
    ]
  }
}
```

Display Result

URL: <http://127.0.0.1:8888/api/report/display>

Method: POST

Request body:

```
{
  "username": "string",
  "filename": "string"
}
```

Response body:

```
{
  "code": "string",
  "message": "string",
  "data": {
    "value1": "string",
    "value2": "string",
    ...
    "value12": "string"
  }
}
```

Export Result

URL: <http://127.0.0.1:8888/api/report/export>

Method: GET

Request body:

```
{
  "username": "string",
  "filename": "string"
}
```

Response body:

```
{
  "code": "string",
  "message": "string"
}
```
